RYNVELD'S GOLD MEDAL BULBS

(FOR THE WHOLESALE TRADE)

We do not issue a retail catalog and cannot fill retail orders

New York City

Yaphank, N. Y.

Central Park, N. Y.

Jacksonville, Fla.

Capitola, Cal.

We take pleasure in presenting herewith our catalog and price list for our many customers and prospective customers. It has been our desire in preparing this catalog to list such items as are in demand by the Florists and Seed Stores and we present below the reasons why we are better equipped to handle these orders than ever before.

TERMS

5% off for cash with order.

2% off for payment within 10 days after receipt of merchandise.

All bills payable net 60 days.

Unless credit is established with us please give references and allow us sufficient time for checking.

All quotations herein are for shipment F. O. B. New York or Chicago at the buyer's option except where otherwise stated. Prices slightly higher on the Pacific Coast.

For the convenience of our Southern customers we can make shipment of Florida grown stock direct from growing station at Jacksonville, Fla.

Cases and packing extra at cost.

Prices quoted herein are subject in all cases to maintenance of present tariff schedule on the respective item and any change made therein before delivery automatically cancels the within quoted prices.

Display Cards for Your Counter Trade

To those who retail bulbs we offer free of charge display card reproductions in natural colors. It is important that you have these as they are of considerable assistance in increasing sales and obtaining new customers.

SERVICE

We maintain offices and warehouses at New York and California and carry a complete line of fall bulbs in stock for our customers requirements.

Wire orders are filled the same day as received by us. All others within 48 hours of receipt. Your inquiries are welcomed and we are pleased to make suggestions as to culture or selection when requested.

We have a representative in your territory. Let us have him call on you.

PRICES

Allow us to sound a word of warning to those who contemplate placing orders based upon competitive quotations. During a period of declining prices such as we have had recently, competition has developed into a frenzy of price cutting with the inevitable result that quality is sacrificed for the sake of price. Skimping on price when purchasing bulbs invariably results in depreciated returns at blooming time.

We maintain that **quality for quality** our prices are lower than those quoted by others not interested in maintaining the high standard which we have set up.

SQUARE DEAL

To those who have dealt with us for years we need not repeat our policy of square dealing. To our new customers we desire to say that at all times we are anxious to adjust differences. Occasionally, mistakes occur and we receive requests for adjustments. Many are not our fault but our policy of "a square deal for the Florist" will not allow us to overlook them.

WE GUARANTEE

That all bulbs leave our farm or warehouse in good condition, packed in boxes sufficiently strong and substantially secure to insure delivery in good order but we do not assume risks in transit.

That all stock is true to name as represented.

That all stock is inspected and found to be sound and free from disease when shipped.

WE DO NOT GUARANTEE

Productivity — The actual growing of flowers is subject to many conditions over which we exercise no control. We allow five days after delivery for inspection by the purchaser and cannot entertain complaints made after the expiration of this period.

All requests for adjustments must be made in writing to our main office at 149 West 24th Street, New York City and we assume no liability for those made verbally to our salesmen or in any other way.

AMARYLLIS HALLI

(*Lycoris Squamageri*)

The hardy amaryllis; produces attractive

EUCHARIS AMAZONICA (Amazon Lily)

Eucharis are among the most desirable greenhouse bulbous plants. Very beautiful and free flowering. Pots should be well drained, as the bulbs require much water during flowering period. A temperature of 65 to 70 degrees is best. By drying off the bulbs to some extent for a few weeks, a crop of flowers may be had at almost any season. Do not dry bulbs too much, so foliage is lost, else bulbs will weaken. The bulbs bear from 2 to 3 flowers on a stem.
